...coming Nike Air Max 90 Viotech Multi is an amazing shoe with an equally as amazing back story. It's quite weird that the Swoosh would release the Viotech 2.0 before the Viotech, there's actually a big reason behind this, and here's everything that you need to know. The Viotech 2.0 was meant to act as a spiritual successor to the Japanese exclusive Nike Dunk Low 'Viotech' from 2002, but after hearing the pleas of many sneakerheads to release the AM90 in the OG palette, the Swoosh was more than happy to do so, hence the release of the Air Max 90 Viotech Multi. Made from an array of buttery smooth suede
